

Vehicular Access Points
The new, upgraded and existing vehicle access points across the site

Primary Road Infrastructure and Access
The primary vehicular routes establish a workable access and movement strategy across the site

Green Space and Amenity
Locations of Green Infrastructure, amenity space and other landscape elements such as SUDS components and visual screening are set out within the masterplan framework

Development Plots
Development plots establish acceptable locations for development as well as the mix of uses of that can be developed in different parts of the site
